Gas Log Sets and Hearth Systems

Get the Best of Both Worlds — *Beauty & Convenience*

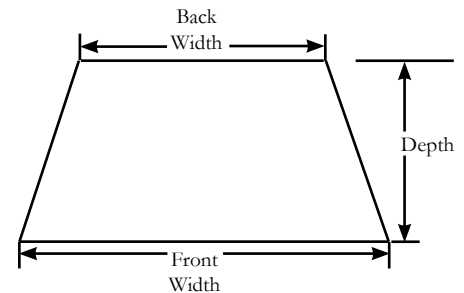

Convert your woodburning fireplace with an authentic-looking Heatilator® Gas Log Set and get the look of a traditional, open-hearth fire with the ease, cleanliness, and immediate gratification of gas. The robust flames won't overheat your room, so you can enjoy your fireplace year-round.

- Clean-burning gas is more environmentally friendly than wood
- Beautifully detailed, realistic logs
- Limited Lifetime Warranty—the best in the industry!

As Easy as 1-2-3

Step 1: *Measure Carefully*

If you already have a Heatilator woodburning fireplace, or are purchasing a new model, simply refer to the sizing chart in this brochure to find your specific model. Otherwise, take measurements of your fireplace floor (Front Width, Depth & Back Width—refer to the drawing on this page). Then bring the dimensions to your nearest Heatilator dealer.

Step 2: *Select a Hearth Kit/Burner*

Choose a hearth kit that fits your firebox, keeping in mind the four types of burner lighting systems.

Hearth Kits

Hearth kits go hand-in-hand with your gas log set to complete your fireplace conversion. They include the burner assembly, ember bed materials, clamps, connectors, and other hardware. All gas log sets must be used with appropriately sized hearth kits, sold separately (a hearth kit is included with both the Fireside Grand Oak and Campfire log sets).

There are four different types of burner lighting systems:

- **Matchlight** (Natural gas only)—Requires manual lighting each time you start a fire; the absence of valves or controls allows for use of the largest log set possible (no remote available)
- **Safety Pilot**—Provides a standing pilot ready for lighting (no remote available)
- **Remote Ready**—Safety pilot system operable via an optional wall switch or remote control
- **Intellifire™ System**—When the gas logs are turned on, the pilot lights first then ignites the main burner; when the gas logs are not operating, the pilot also shuts down. Uses two D size batteries for operation. Remote control option.

Step 3: Select Your Gas Log Set

Pick your favorite design and ask your Heatilator dealer to help you make sure it's available in a size that's compatible with your hearth kit.

Gas Log Sets

Six different log set designs let you achieve the look you want, in sizes to fit almost any firebox. For the most realistic appearance, we recommend selecting the largest logs your fireplace will accommodate (refer to sizing guide on back of brochure).

Fireside Grand Oak 24", 30", 35" & 40"
Specifically designed to fill larger fireplaces, this winner of the 2005 Vesta® Award for Best Gas Log Set easily fills generous hearths.

- 11 authentic-looking logs, molded from real oak timber (12 logs on 40")
- State-of-the-art, tiered burner system creates a multi-level fire
- Hidden controls are easily accessible, won't detract from the fire's authenticity, and allow the log set to fit perfectly centered
- Offers three types of burners: Matchlight (NG only), Safety Pilot, and Intellifire
- Includes burner and hearth kit

Fireside Supreme Oak 18", 24" & 30"
(See-through set in 18" & 24")
Realistically-detailed logs with the appeal of a fully charred, mature fire.

- 12 authentic-looking logs, molded from real oak timber
- Works with three types of burners: Matchlight (NG only), Safety Pilot, and Remote Ready
- Hearth kit/burner sold separately

Fireside Realwood 18" & 24"
A good look at a great value!

- Eight richly-detailed logs
- Works with three types of burners: Matchlight (NG only), Safety Pilot, and Remote Ready
- Hearth kit/burner sold separately

Fireside Versawood (split log shown)
18", 24" & 30"

Achieve two different looks; split log or full bark—simply by turning the front logs.

- 11 authentic-looking logs, molded from real oak timber
- Works with three types of burners: Matchlight (NG only), Safety Pilot, and Remote Ready
- Hearth kit/burner sold separately

Campfire 18", 24" & 30"
(See-through set in 24" only)
Recreates the natural look of a traditional campfire.

- Front log conceals and insulates the controls so that the log set can burn with fireplace doors closed
- 18" and 24" sets have 10 fiber logs, 30" set has 11 fiber logs
- 24" see-through version has 13 fiber logs to accommodate multi-sided fireplaces
- Offers one type of burner: Standing Pilot
- Includes burner and hearth kit

Outdoor Gas Logs
18" & 24"

A realistic log set that withstands the worst of Mother Nature.

- Stainless steel burner tube, grate and sand pan burner
- Eight richly-detailed logs
- Offers two types of burner: Natural gas (matchlight); LP gas (standing pilot)
- Burner and hearth kit sold separately
